S/056/60/01 1001-006/048
E004/8070*24.6900*AUTHORS: Marutyan, N. A., Matevosyan, K. A., Toshyan, R. T.TITLE: Investigation of the Interaction ¹⁹ of a $5 \cdot 10^{12}$ -ev Nucleon
With a Photoemulsion NucleusPERIODICAL: Zhurnal eksperimental'noy i teoreticheskoy fiziki, 1960,
Vol. 39, No. 4(10), pp. 993-996

TEXT: On a systematic examination of an emulsion pile (Ilford G-5, 600μ) irradiated for 8 hours at a height of 27 - 30 km, the authors found one $6 + 31p$ interaction. The event is interpreted as an interaction of a nucleon with a nucleus of the emulsion, and its energy spectrum is studied. The energy of the primary particle is then found to be equal to $(4.7 \pm 1.0) \cdot 10^{12}$ ev. The measurements were made with an MBI-8M (MBI-8M) microscope. The angles of all shower particles related to the primary particle as well as their energies were measured (Table). Fig. 1 shows the angular distribution of the secondary particles, and Fig. 2 the transverse momentum distribution. The mean length of the

Investigation of the Interaction of a
5.10¹²-ev Nucleon With a Photoemulsion Nucleus S/056/60/032/001/016/048
B004/B070

nuclear interaction was of the order of 30 cm, the mean transverse momentum was (0.17 ± 0.02) Bev/c. The best agreement between the hydrodynamic theory of L. D. Landau and the experimental data is obtained for $kT = (1/2)\mu_{\pi}c^2$. The primary particle gave 10% of its energy for the formation of the secondary particles. The authors mention a paper by G. A. Milekhin and I. L. Rozental' (Ref. 6). There are 2 figures, 1 table, and 7 references: 4 Soviet, 1 British, and 2 Italian.

56AUTHOR: Arustamova, M. Ye., Kanetsyan, A. R., Sarinyan, M. G.,
Toshyan, R. T., Tumanyan, V. A., and Tymanyan, E. R.TITLE: Production of hypernuclei by 8.8 Bev protonsPERIODICAL: Zhurnal eksperimental'noy i tekhnicheskoy fiziki, v. 44, no. 3,
1963, 861-865TEXT: This paper is the continuation of the work investigating the production of hypernuclei in photoemulsion exposed to the internal 8.8 Bev proton beam. The experimental procedure was described in an earlier paper by V. A. Tumanyan, M. G. Sarinyan, D. A. Galstyan, A. R. Kanetsyan, and M. Ye. Arustamova (Ref. 1: ZhETF, 41, 1007, 1961). The results are summarized in Table 1 containing the first known cases of the B_A^{10} and B_A^{11} decays. The article concludes with a detailed discussion of the results on the basis of theoretical suggestions by F. Ferrary and L. Fonda (Ref. 3: Nuovo Cim., 7, 320, 1958) and H. Primakoff and W. B. Cheston (Ref. 4: Phys. Rev., 92, 1537, 1953). The physical results are in agreement with the conclusions of the first part of the Ref. 1. There are 3 figures and 2 tables.

"Our Observations on the Epidemic of Serous Meningitis Caused by ECHO₄ Virus in the Zajecar District in 1962."

Belgrade, Srpski Arkhiv za Tselokupno Lekarstvo, Vol 93, No 4, Apr 1965; pp 363-371.

Abstract [English summary modified]: Very comprehensive data on the severe epidemic of ECHO₄ serous meningitis in the Zajecar district June to October 1962; illness among children was the highest (1.4% or 458 affected children among 32,712 aged 0 to 7 years in the district). Presentation of clinical and epidemiologic details including cerebro-spinal fluid and other test results. Map, 4 tables, 2 Western and 9 Yugoslav references; manuscript received 20 Oct 64.

Correct expression of the errors of functions. Zápravodaj VZLU no. 5;
3-5 '61.

9/044/63/000/002/038/050
A060/A126

AUTHOR: Tosovsky, Josef

TITLE: Correct expression for the error of a function

PERIODICAL: Referativnyy zhurnal, Matematika, no. 2, 1963, 40, abstract 2V181
(Zpravod. VZLÚ, 1961, no. 5, 3 - 5; Czech; summaries in Russian,
English)

TEXT: The author considers the problem of the correct expression of the random error of a function. In the beginning of the paper, after interpreting some of the concepts of mathematical statistics, the author considers the problem of determining the error of a function and cites an example where the direct method of determining the error of the function has no definite meaning. Further on, a method is proposed for expressing the error of a function of mean values which is free of the above drawback. This expression is derived for the case of dependent measurements and in it the order of magnitude of the remainder terms is defined. A criterion is also proposed in the paper for estimating the values of the means of two functions and a numerical example is cited.

EXCEPPTA MEDICA Sec C Vol 13/2 Survey Sept. 50

4776. (1166) THE DIAGNOSIS AND TREATMENT OF SOLITARY CYSTS -
Příspěvek k poznání a léčení solitárních kostních cyst - Stryhal F. and
Tošovský V. - ACTA CHIR. ORTHOP. TRAUM. ČECH. 1950, 26/1
(9-14) Graphs 1 Illus. 8

Based on experience with the treatment of 101 cases of solitary cysts of the bones the indications and counterindications for surgical treatment are discussed. Reliable surgical results are obtained only with stabilized cysts in a quiescent stage. Early surgical treatment is recommended in active evolutive cysts only when there is a danger of pathological fractures or aggressive growth and in cases of an atypical clinical picture with suspected malignity. Finally there is a discussion of the differential diagnosis of bone cysts from some similar conditions with which they are confused.

1950. 1166. THE DIAGNOSIS AND TREATMENT OF SOLITARY CYSTS ASSOCIATED WITH NERVOUS DIS-
